

YOUR PROJECT
OUR EXPERIENCE

**COLOUR
CEILING SOLUTIONS**

CREATE MORE VIBRANT SPACES

Colour defines the ambience of a room, playing an essential role in stimulating mood and changing people's entire experience of a space. By selecting specific colours, you can influence people's emotions, designing a space that is fit for function.

Improved well-being can result from a room designed with people in mind. Coloured ceilings stir emotions and alter the tone of a room. Lighter colours make a room feel brighter, prompting people to be more proactive. In contrast, darker colours will bring a sophisticated and intimate atmosphere to a space, creating a feeling of cosiness and warmth.

Coloured ceiling tiles with good sound absorption allow people to focus on work, conversation, and collaboration as they provide a great indoor climate for productivity and comfort.

Colour affects all aspects of the design, theme, and personality of a building, making an interior space visually striking. You can achieve this by choosing from the multitude of coloured solutions available from Knauf Armstrong.

4 Optima Canopy Hexagon

5 W-H 1000, RAL 2008

YOUR PROJECT:

1 LOUNGE / BREAK OUT AREA

Lounge areas are designed to make people feel relaxed and at ease, being an escape from the chaos of everyday life. Adding colour to a room can foster well-being or help create a positive ambience. Used in combination with sound absorbing tiles, you can make a space that is equally peaceful and enjoyable.

2 LOBBY / RECEPTION

Bold choices make design look considered and intentional. A coloured, sound absorbing ceiling within a grand entrance gives guests a memorable first impression. Coloured canopies and baffles create drama and turn reception desks into focal points. Choose from a variety of shapes, materials and even brand colours, to help transform a lobby into an area that encompasses a brand personality.

3 CAFETERIA / RESTAURANT

The colour of a space not only affects mood, but it can also influence appetite. Warmer tones such as red are proven to enhance the overall dining experience. Selecting a ceiling that also provides outstanding acoustic performance will improve the atmosphere, enhancing background music and making conversation clear. In combination with a vivid colour choice, you will create a space where people feel welcome.

4 SUPERMARKET AREA / RETAIL STORE

Designing a captivating retail space will always draw customers in and shape the entire retail experience. A coloured acoustic ceiling solution is attention-grabbing, and can improve the ambience by absorbing background noise. Strategically placed canopies are striking visuals that highlight customer service and check-out areas, and act as a backdrop for vital signage, assisting customers while they shop.

5 CORRIDOR / CIRCULATION AREA

By using dynamic colours, a circulation area can be elevated, bridging the styles of various spaces, and developing a building that flows together in a streamlined fashion. Using sound absorbing ceilings will reduce the noise caused by hustle and bustle within corridors, resulting in a functional environment that is trendy and stylish.
